MAINTENANCE

As of November 2013 members Adam, Mitch, Mathew, Josh, and Tony all helped restore the old water tower that had been sitting for years. We gave it a new coat of paint and a sanding and it's looking great!

Maintenance is underway at the railroad. Member Ralph Clark is in the process of obtaining new wheels for our passenger car fleet. As of right now we have 3 cars out of service, but hopefully that will change.

RAIL IS ON THE WAY!

We are expecting a shipment of steel rail to add to the railroad. We are planning to finish the third loop with a reverse loop build in and then connect it to the main yard. I know this sounds complicated but here is a diagram to help explain it.
